Możliwość żółknienia powłoki koloru białego.

Drewno jest produktem naturalnym, którego usłojenie, struktura i kolor podlegają wahaniom związanym ze wzrostem, lokalizacją i klimatem. Co więcej odcień barwy powierzchni drewna zmienia się z biegiem czasu w wyniku działania światła i ciepła.

Temu naturalnemu procesowi starzenia się podlegają w mniejszym lub większym stopniu wszystkie rodzaje drewna. Drewno nie jest odporne na światło. Działanie światła słonecznego, także rozproszonego światła dziennego wewnątrz pomieszczeń, przyczynia się najbardziej do zmiany koloru. Stopień występującej zmiany odcienia barwy zależy nie tylko od upływającego czasu, lecz także od umiejscowienia mebli.

Elementy niewidoczne takie jak : np. stelaż, dna szuflad, deska podtrzymująca stelaż, itp. nie są malowane, tak jak pozostała część łóżka.

Wszelkie śruby, a także wkręty proszę wkręcać delikatnie i powoli, w celu uniknięcia pęknięć.NIEWKRĘCAĆ okuć blisko krawędzi !

There is a possibility of yellowing of the coating of white coloured beds.

Wood is a natural product, whose natural grain, texture and colour are subject to fluctuations associated with growth, location and climate. Moreover, hue of the wood surface varies over time as a result of light and heat.

This natural process of aging is subject to greater or lesser extent on all types of wood. Wood is not resistant to light. Sunlight as well as diffused light inside the room contribute the most to colour change. The degree of changes to the shade depends not only on the passing of time, but also on placement of the furniture.

Invisible elements such as slats, frame supporting the slats, bottoms of drawers, etc. are not painted as the rest of the bed.

All bolts and screws are to be screwed gently and slowly to avoid damaging the panels by cracks. Do not screw fittings close to the edges.

ATTENTION!

After assembling, please wipe the bed with a damp cloth. The product might give off a strong scent of paint after assembling, usually up to 72hours.
