Diagram illustrating the assembly of the wardrobe doors. The main drawing shows the wardrobe with doors open, highlighting the hinges (9) and the internal structure (10, 11). A detailed inset shows the hinge (W) being attached to the top rail (R) with a red arrow indicating the direction of movement.

Figure 1c shows a schematic diagram of a curved surface, likely a lens or a part of a microscope. It features two circular elements on the left and a small rectangular element on the right, all positioned on a curved background.
